

Driver ed FLDOE Approved Online Course at NO CHARGE

In response to the COVID-19 pandemic, Richard Corcoran the Commissioner of Education met with all FLDOE approved Virtual Providers and requested that they help Florida school districts to swiftly implement distance learning options. Out of solidarity and concern for the students and teachers affected by this pandemic **we are offering our accredited online driver education course at no charge for the remainder of the 2019-2020 school year.**

The below services will be included and provided at no charge to your district:

- [Fully ACCREDITED and approved by the Florida Department of Education](#) (FLDOE).
- Students earn ½ high school elective credit towards graduation.
- Includes the required Florida Traffic Law and Substance Abuse Education Course (TLSAE).
- Includes the online FL Learning Permit Exam for FREE ([we are a FLHSMV-approved tester](#)).
- Enables your district to retain BOTH the FTE and the Virtual Education Contribution.
- Students meet the Florida state-mandated online graduation requirement.
- Turnkey Learning Management System to allow your teachers and students to get up and running in just minutes.
- Public web page to allow students to self enroll.
- To learn more watch [this video](#).

In addition, we will cover the cost charged by FLHSMV for both the TLSAE (Traffic Law and Substance Abuse Education) and Permit Test, which are required elements to obtain a drivers license in Florida, for all your students taking our course during this period as our donation to help both our students and school community.

We understand that districts are facing a monumental challenge to provide immediate online options for their students, thus we are prepared to assist with whatever measures are necessary to get our course implemented quickly so that students can start or continue in a driver education course that has already been started in the classroom.

If you are interested in enrolling your district in this program please let us know, by replying to this email or call (800) 829-3727.
