

S.W.A.T. Club

Students Working Against Tobacco is a club focused on bringing awareness of the harmful effects of tobacco & nicotine from smoking, vaping and chewing tobacco. The club also focuses on building leadership skills, as members work within the community toward policy change and educating others. We promote cessation programs for all who find themselves dependent on nicotine, and hope to build future generations that are not dependent on smoke and nicotine. S.W.A.T. is an initiative under Tobacco Free Florida and our local chapters operate under the Leon County Health Department.

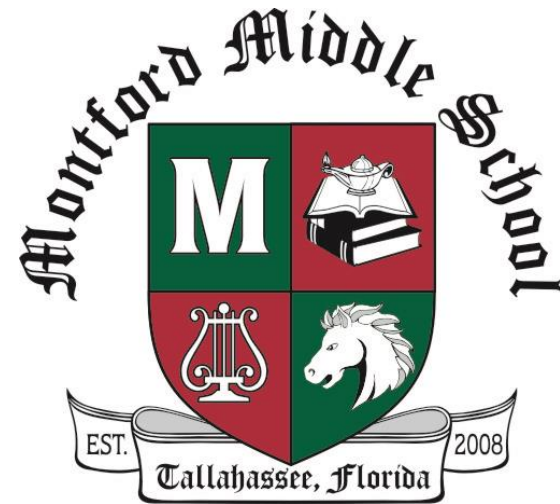

Our club members meet monthly to plan and implement activities on our school campus and in the community that promote a tobacco/nicotine-free lifestyle. Members send the message through a variety of creative activities.
