Boosterthon

Our class has raised \$35 per lap for our school! The student challenge this weekend is if a student gets \$2 in pledges, they will earn a boomerang. Thank you to all of our families for your generous contributions and efforts to help our school. Next week Roberts will begin our annual fundraiser. Look for more information to come home on Monday after our student kick-off. Let me know if you have any questions.

A.R. Reading

Please continue to have your child read nightly in order to make sure they meet their goal. I will be giving out their new goals on Tuesday next week. They will have a Reading Log in their Fox File that has the goal written on it. Remember, the Challenge Goal is double the number of points and students get a special treat for reaching that goal.

Math- Multiplication

We have started our chapter on Multiplication. This is an extremely important skill that begins in 3rd grade. It is very important that your child becomes fluent. Flashcards at home are a great way to practice. There are also several free websites that have multiplication skill practice including one that we use in class, Xtramath. I am encouraging students to begin to practice 3-5 minutes a day in the next few weeks.
