Printables for any Word List

Purpose: Your printables have been designed to complement your reading and spelling programs.

Most pages in this file are aimed to suit the different levels of acquisition in your classroom with the use of the empty box ☐ . This allows the teacher to differentiate the amount of words allocated to the word list and the student.

A variety of activities involving pairs, art, hands-on, mathematical, word work and more has been included so that your students are working with words in different ways thus meeting the varied learning styles in your classroom.

How to: Print off the pages that are suitable to your students. You may like to staple them as a booklet, using the student booklet cover seen in the file. You could also print two worksheets to one page using your printer settings.
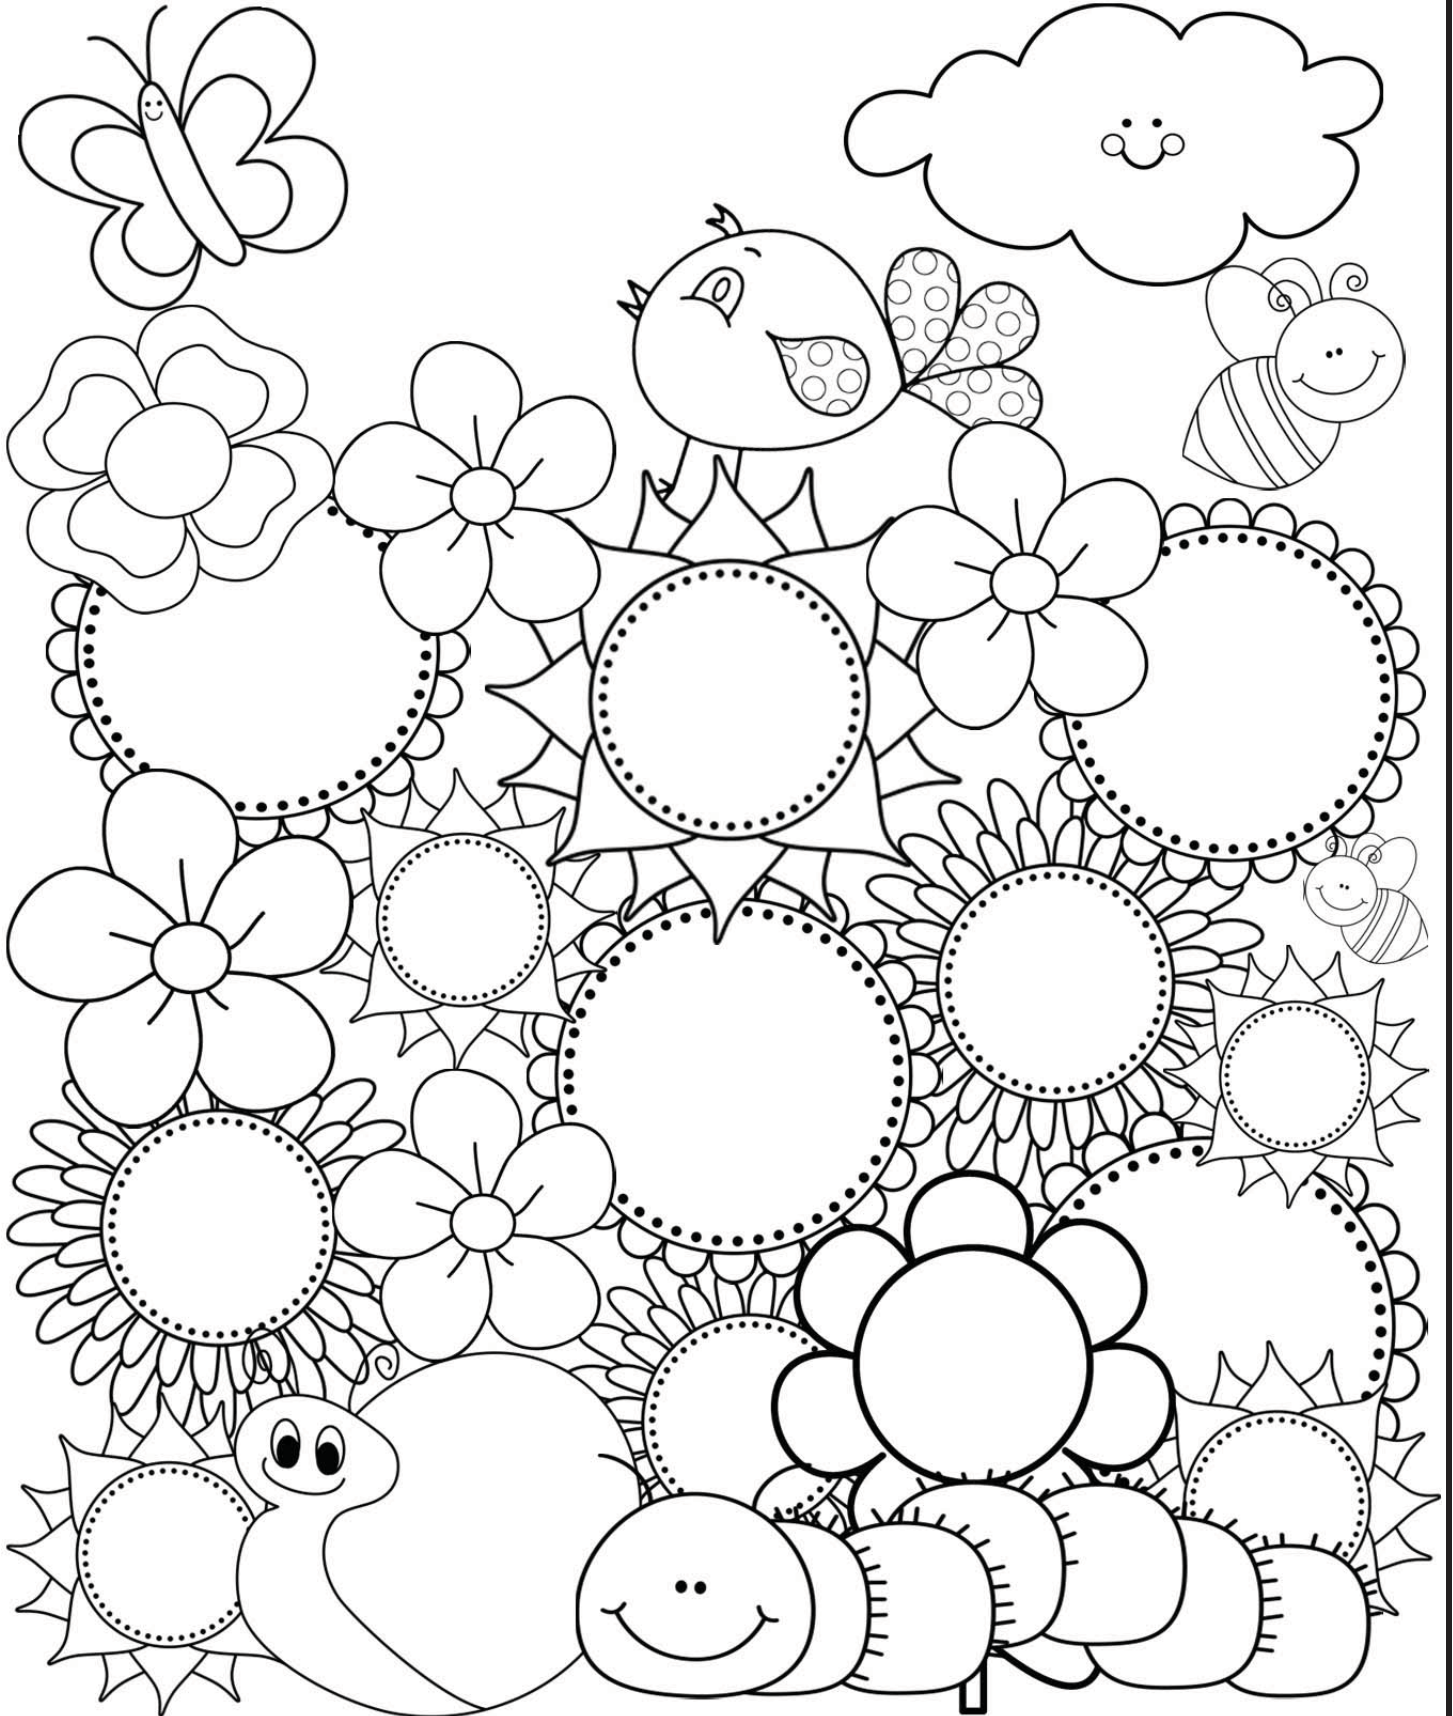

Use the different modes of recording (hands-on, mathematical, pair work, working on meaning, art etc.) words based on your program and students.
