

Name: _____ Date: _____

Solve these word problems by writing a numerical expression. Remember to use only numbers and mathematical symbols (no variables). (I'm not asking for totals.....)

John has 45 baseball cards. His friend gives him 12 more cards, and then he buys 8 additional cards from the store. Write an expression to show how many cards John has in total.

A bakery made 156 cookies. They sold 89 cookies in the morning and 45 cookies in the afternoon. Write an expression to show how many cookies are left.

The school library has 234 books. They received a donation of 167 new books and then removed 58 damaged books. Write an expression to show how many books are now in the library.

Maria has 24 stickers. Her and 5 friends will share them equally. Write an expression to show how many stickers each person will get.

The cafeteria has 127 apples. They use 38 apples for lunch and then receive a delivery of 45 more apples. Write an expression to show how many apples they have now.
