greater than - more in quantity
on amount

less than: fewer in quantity on
amount

> is greater than*

< is less than*

**It is important that students come to recognize and understand what these symbols mean even when there aren't numbers surrounding them.*

IMPORTANT TIPS

- When comparing two numbers, always encourage your child to compare the numbers in the tens place before looking at the numbers in ones place.
- Problems such as the one below are tricky because they require multiple steps. Help your child solve the problem one step at a time. Have them cross out the cards that are given away.

Try Another Problem

Make a model to solve.

1. Tony has these number cards. He gives away the cards with numbers less than 16 and greater than 19. Which number cards does Tony have now?
