This will take the student to the Login Page. There is a note at the top to remind students and parents how to log in.

Now click on the green Login with Username & Password Button:

Students will then be prompted for their Username and Password. Student usernames are their student number followed by @edu.leonschools.net. Their passwords are unique and they use them every day at school so the students should know them.

Once the student logs in their ClassLink Dashboard will appear with their assigned apps.
