

Mini Study Guide

Movement of Materials in and out of the cell

- 1. How does the cell maintain Homeostasis?**
- 2. Define Active and Passive transport. Give two examples of each.**
- 3. What is Diffusion? Which way do particles/molecules move in diffusion?**
- 4. Define Osmosis.**
- 5. Which way will the water molecules move during osmosis?**
- 6. What is the cell membrane made of?**
- 7. Define Exocytosis and give an example.**
- 8. Define Endocytosis and give an example.**
