

The Virtual Science Collaborative

Need support navigating the challenges of teaching science virtually?

Want to learn with others, share your experiences, and access materials and resources to help you navigate this new science education frontier?

The Virtual Science Collaborative at Florida State University is here to help! When you join *The Collaborative*, you and other 6-12 science teachers will be supported to interact with each other, with content and curricular experts, with leaders in science education instruction, research, and professional development, and with professionals from Instructional Design and Online Learning. Towards this goal, *The Collaborative* is hosting free synchronous events including workshops and seminars, a community forum, and an ever-growing selection of curricular materials and resources led by emerging issues related to teaching in a virtual learning environment.

Check out our [Curricular Corner](#), join the [Discussion](#), view [Upcoming Events](#), and **collaborate with us** at <https://fsusciencelaborative.org/> or sign-up for a workshop or two on our [eventbrite](#) page. Below are four of our upcoming workshops.

	TUE, OCT 13 5:00 PM Workshop: Florida's TESLA Tails - Electricity and Magnetism
FREE	#ScienceTech #Seminar  
	TUE, OCT 27 5:00 PM Workshop: Making the Most of Zoom and Other Tech Tools
