<p>Open to All Teachers, but if seats are all filled priority will be given to teachers who attended the summer 2024 Kagan professional learning series!</p>	<p>Knowles Professional Learning: Strategies for Effective Groupwork Grades K-12</p>	<p>Facilitating successful collaborative groupwork in science and math education can be challenging due to difficulties in crafting collaboration-dependent tasks, ensuring focused productivity, and addressing workload and participation imbalances among students. Our course, designed for educators dedicated to enhancing math and science engagement, introduces Complex Instruction (CI) as a research-backed instructional strategy. Participants will delve into strategies to improve collaboration through groupwork, learning how to address common pitfalls while engaging students with challenging content. By the end of the course, teachers will possess a toolkit of strategies to improve group dynamics, foster participation, and deepen student engagement in collaborative settings. Armed with these skills, participants will be equipped to create collaborative learning environments where every student can thrive, ultimately shaping the next generation of scientists and mathematicians who value and excel in teamwork.</p> <p>Highlights</p> <ul style="list-style-type: none"> • Identify the components of Complex Instruction (CI) and develop specific plans for implementing components of CI in their classroom • Use participation quizzes, role interventions, and status treatments to disrupt traditional participation patterns 	<p>LEADS Course 26999 (Section 34141) ----- August 22, 2024 4:30-6PM via Zoom</p> <p>Attendance link available in LEADS Course section notes.
