

Name : _____

Radius & Diameter

Easy: S1

Find the radius and diameter of each circle. Radius is the length from the center of the circle to the edge of the circle. Diameter is the length from one edge of the circle to another through the center. The diameter is twice as long as the radius; the radius is half as long as the diameter. Use this information to solve. The first 2 are done for you.

1)

Radius = 3 yd

Diameter = $2(3) = 6$ yd

2)

Radius = $92/2 = 46$ in

Diameter = 92 in
