<input type="checkbox"/> ReadWorks: Save Your Paper, Help Earth
Week 9:
<input type="checkbox"/> ReadWorks: Three Kinds of Water

Three Kinds of Water

by Linda Ruggieri

Credit: alisdair (CC BY 2.0)

Did you know that water comes in three different forms?

Water can be *liquid*. We drink liquid water, and we wash with it.

Water can be *solid*. Frozen water is called ice. Ice is solid. We use ice cubes to keep drinks cold.

Water can be *gas*. An example is steam. When we boil liquid water, it turns into steam. Steam also creates heat to warm homes.

People need water to live. So remember, use water carefully. Never waste water.

Name: _____ Date: _____

1. How many forms of water are there?

one

three

2. What form of water do we use for drinking and washing?

solid water

liquid water

3. What do we call solid water?

ice

steam

4. How can steam be made?

by boiling water

by freezing water

5. What is an example of water when it is a gas?

An example of water when it is a gas is

6. What did you learn from "Three Kinds of Water"?

7. Draw a picture of water turning into steam.
