KIDDOM

Professional Learning with Kiddom

Abbas Manjee
Kiddom Co-Founder
and Chief Academic Officer

Technology can further enhance the accessibility of a curriculum. The textbook is a technology and for far too long, we've synonymized "textbook" with "curriculum." The reality is, many teachers do not use textbooks on an everyday basis for lesson planning. At Kiddom, we believe it's critical for educators to receive targeted professional learning pairing content with technology, because our technology was specifically designed to support the process of unpacking, understanding, and using high quality core curriculum. With our professional learning offerings and personalized support, you'll have everything you need to facilitate equitable and excellent teaching and learning experiences.
