Chapter 7 – Money and Time

Chapter Essential Question:

How do you use the values of coins and bills to find the total value of a group of money, and how do you read times shown on analog and digital clocks?

A.M. - the hours between midnight and noon
cent sign (¢) – a symbol that represents cents
decimal point – a symbol used to separate dollars from cents
dime – a coin worth 10 cents
dollar – a coin or bill worth 100 cents
dollar sign (\$) – a symbol that represents dollars

Chapter Vocabulary:

midnight – twelve o'clock at night
minute – a unit of time equal to 60 seconds
noon – twelve o'clock at night

nickel – a coin worth 5 cents
penny – a coin worth 1 cent
P.M. – the hours between noon and midnight
quarter – a coin worth 25 cents
quarter past – 15 minutes after the hour

What should you know about money?

Identify and Count Pennies, Nickels, Dimes, and Quarters

Penny = 1¢

Nickel = 5¢

Dime = 10¢

Quarter = 25¢

Show Amounts in Different Ways

49¢

Make a Dollar with Coins

Make Amounts Greater than \$1

What should you know about time?

Time to the Hour and Half Hour

4:00

8:30

Time to 5 minutes

12:50

9:05

Practice Telling Time

8:15

15 minutes after 8
or
quarter past 8

8:30

30 minutes after 8
or
half past 8

8:45

15 minutes to 9
or
quarter to 9

A.M. and P.M.

Noon is 12:00 in the daytime.
Midnight is 12:00 at night.

Times after midnight and before noon
are written with A.M.

11:00 A.M. is in the morning.

Times after noon and before midnight
are written with P.M.

11:00 P.M. is in the night.

The time you eat breakfast:

7:00 A.M.

The time you eat dinner:

7:00 P.M.
