Immunization Clinic Information

Following is a list of locations for health services. It is recommended that students be referred to their own provider for physicals or immunization services. If they don't currently have a primary care provider, the community clinics listed below are an option. In order to request a sliding fee scale, parents would need to provide proof of income and they should ask when they call for an appointment to get each providers requirement for this request.

Out-of-state immunization records can be dropped off to your local health department. There is a (5) business day turnaround. A health department representative will call you to pick up the new Florida Shot record once completed.
