Suggestions for Use

- I made this unit to go along with the book, *Mr. Popper's Penguins* by Richard and Florence Atwater.
- The thought is that you would be reading it aloud to your class at a rate of about ½-1 chapter per day.
- Be sure to give each student their own copy of the story board (pg. 7-8) to use while reading and discussing the story.
- Benefits of reading out loud, even to classes made up of severely affected students:
 - Teaches students to sit quietly even when there isn't something for them to do. This is such an important life skill. We all have to spend time sitting and listening to someone we are not that interested in at some point.
 - Parents will LOVE you. Not only will they be excited their child is being exposed to age appropriate material, but you are teaching them how to sit quietly, which will hopefully transfer to home as well.
 - Even with your lowest level learners, you will have 1 or 2 that will truly enjoy the story.
 - It can be a calming experience to sit and listen to the teacher read in a methodical way.

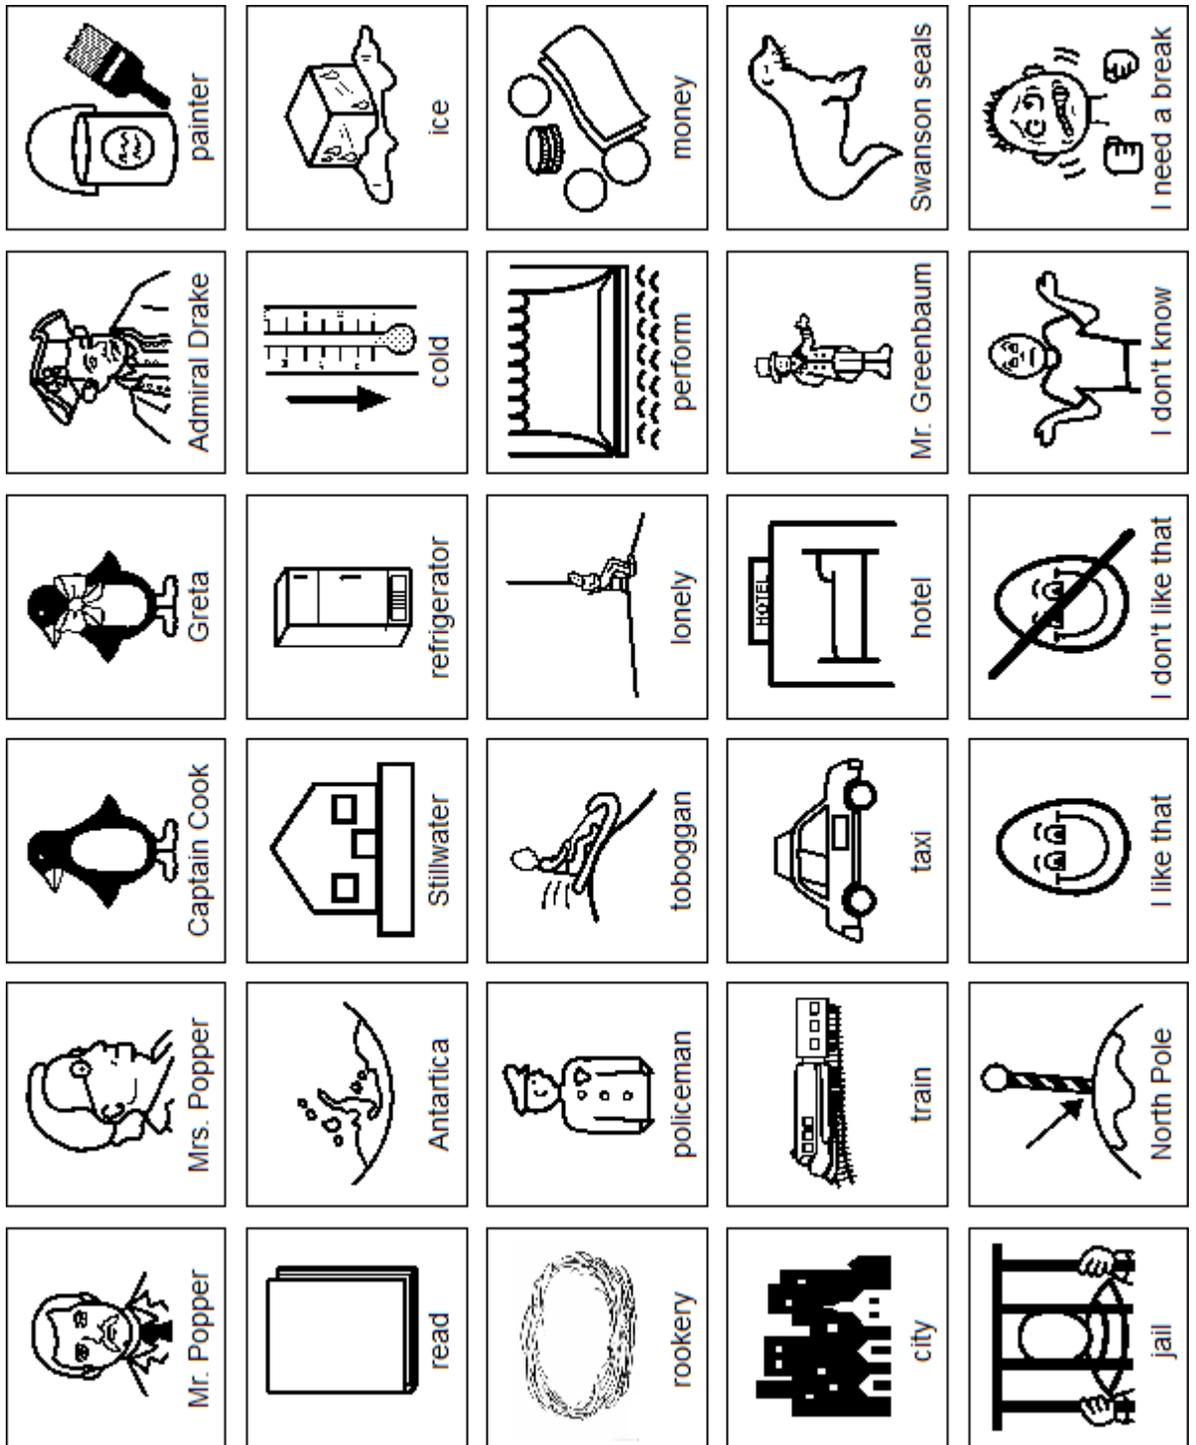

Suggestions for Use

- For students who need more structure, place the number of post-it notes in front of him/her that corresponds to the number of pages you intend to read. Remove a post-it as you finish each page. The visual will help lessen their anxiety.
- As you finish each chapter, there is an activity for your students to complete.
- Differentiation:
 - For any activity, you can quickly differentiate for your lower level learners by using a color coding technique.
 - If sorting, outline each sorting category a certain color and then outline the corresponding pictures the same color.
 - Becomes a matching task.
- I purposefully did not include an assessment in this unit, because I did not feel that would be the goal of reading a higher level novel over such an extended period of time. Instead, you should be focused on shaping and teaching the behavior of sitting.
- *I have started adding an option to use when you want students to have to choose between correct and incorrect answers in some of the activities. I am still including an errorless version as well. Hopefully, this will address even more learning levels in your class!*

My Winter Wonderland Writing Prompt

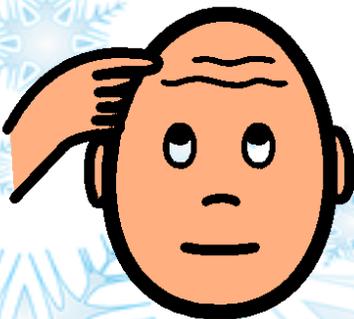

- The following activity is a great way to modify a writing assignment so even the most significantly affected student can “write a story.”
- Explain that your students will be writing about how it would be to turn their own home in to a winter wonderland like Mr. Popper did.
- Choose from the pictures on the second page as to what they would have in their own wonderland. **Students should not use all the pictures, just the ones they want to.
- Students can also just come up with their own ideas.
- The next step is for students to decide how their parents would feel about their wonderland. Glue the picture of their choice depicting an emotion.

The bills are piling up and the Popper family is running out of money. One thing that is important is for the family to figure out what they really need rather than things they may just want. Sort the pictures on the next page into those things the Poppers would truly need and those things that would just be nice to have.
