

Using a Color Scheme Generator

In this activity, you will use a color scheme generator to explore various color schemes. Follow the directions below.

1. Visit the [WebsiteTips.com Color Scheme Chooser](http://websitetips.com/colortools/sitepro/) page at <http://websitetips.com/colortools/sitepro/>.
2. Experiment with various colors by dragging the black box along the color palette.
3. Test each color chosen in the monochromatic, complementary and triadic color schemes.
4. Change the color scheme by selecting the scheme name in the **Scheme** drop-down list.
5. Create a list of two or three colors schemes you like, and include the scheme type and the colors used.
6. Think about the kinds of Web sites your color schemes would enhance the message or purpose of the site.
