

# Creating a Web Page — Part 1

In this activity, you will create a Web page using an HTML text editor.

Your page should contain the following:

- A hyperlink to the Google home page that opens in a new window.
- An unordered list that displays the names of four classmates.
- A blockquote that contains the following quote: **“It is wiser to find out than to suppose.” – Mark Twain**
- A paragraph that contains two or three sentences about what you are learning.
- An image of an animal that is 200 pixels high by 200 pixels wide. (Search Google Images using the phrase "animal image 200 x 200." Be sure to click the Search Tools button and select Labeled For Noncommercial Reuse from the Usage Rights list.)

Save the page as Lesson3\_Ex1.html, and then view it in a browser.
